Super Automatic Coffee Machines

Our technologies

Our machines are designed and manufactured by a qualified and highly skilled team: every day, Carimali staff are dedicated to keep up innovative performances and top quality standards.

A key-role is played by our major investments in R&D, that allow us to launch brand new products at a very fast rate and always offer new solutions to our customers.

Barista Steam Wand:

steam wand with temperature probe to heat and froth milk automatically at the desired temperature, ideal for two-step machines

CoffeeCreator:

useful tool to be installed on any computer to set the parameters of our new generation super automatic machines directly from the computer

CupSense:

detect the presence of small or big cups and dispense the right drink accordingly (i.e. small cup for espresso and big cup for cappuccino)

FridgePlus:

detect over temperatures of milk and consequently stop milk-based drinks; detect empty milk cartons and stop milk-based drinks

Loudspeaker:

useful speaker that allows the user to customise the machine using sounds: play music, promotions and any information via usb connection

MaxSave:

patented technology to maximise energy saving, guarantee high production capacity and reduce power consumption

MTT Milk Tuning Technology:

dispense milk-based drinks at the desired temperature; dispense cold milk and chilled beverages; store the fridge under the counter

PowerCleaner:

assure maximum hygiene conditions of the complete milk circuit and steam boiler through an integrated rinsing system

TFT 5.7" Graphic Display:

drink selection icons, images and commercials can be easily customised; online assistance and clear graphic user instructions

USB Connection:

copy and load machine parameters and settings, customise user interface graphics

MX-3

Armonia and MX-3 are the result of more than 30 years' experience in professional, super automatic coffee equipment.

Perfect medium-size coffee and hot beverage system, designed with flexibility in mind and ideal for every locations, in two main versions: fresh milk and/or powder products.

The flexible design approach and the wide array of product configurations allow the two models to cater for three major segments: Out-of-Home, HoReCa and OCS.

Ease of use and maintenance, clear and fast automatic cleaning operations complete the machines quality offer.

Daily production:
150-200 cups

Drink	Cups per hour*
Espresso	150
Coffee/Cappuccino/Choco	120
Hot water	tot. 40 litres

* the number of cups per hour may vary depending on drink size and setting
